

# Advantage® 3200 Respirator

## Applications

Agriculture  
Asbestos Abatement  
Chemical  
Construction  
Electric Utility  
Hazardous Materials  
Mining  
Nuclear  
Oil and Gas  
Paper & Pulp  
Sanding & Grinding  
Spray Painting  
Welding

## Hazards

Nuisance Odor  
Particulate and Dust  
Toxic Atmosphere Non-IDLH  
Welding

## Product Information

The Advantage 3200 Full-Face Respirator incorporates MSA's global engineering expertise and is designed to meet NIOSH and EN standards.

The respirator features a wraparound lens combined with a soft, pliable silicone facepiece that provides a total solution to your air-purifying respirator needs.

Its fit technology is based on the proven faceseal of the Ultra Elite Facepiece, which was based on facial measurements from more than 8,000 people.

For the utmost in convenience, the Advantage 3200 uses the same cartridges and filters as the Advantage 200 LS Respirator.

The Advantage 3200 Respirator enhances worker performance through a new design that allows even lower breathing resistance and includes a standard noseclip that reduces fogging in low temperatures or high humidity conditions.

In addition, the facepiece lens has a scratch-resistant coating and has been engineered to be optically correct, giving you superior visibility and peripheral vision.

Donning the mask is made easier with pre-adjustable rubber straps. With the Advantage 3000 Respirator, you can set the position of the upper straps to receive a consistent fit, time after time. In addition, the preset upper straps prevent uncomfortable snags during donning and doffing, and also provide a tighter, more secure seal. Wearers also can choose the new European-style Advantage harness, which dons like a catcher's mask.
