

Supporting Authentic Protex II™ Distributors Since 1993

ProTex II™ is a pre-engineered, wet chemical fire suppression system used to protect commercial cooking operations. It satisfies the requirements of UL300, NFPA 17A and NFPA 96. ProTex II™ systems are easy to install, service and maintain and come with a factory warranty. Certification courses administered by our seasoned professionals are offered in multiple forums for safety and convenience. On-demand technical support ensures your questions are answered quickly and accurately.

Distributor Benefits Include:

- Manufacturer's certification that proves authenticity and satisfies many state licensing requirements
- No initial stocking order means cash flow management tailored for today's needs
- Knowledgeable professionals answer the phone and make ordering fast and easy
- Immediate system configuration and technical support provided by industry veterans
- Free CAD drawings with complete system purchases that aid with the permit process
- Over 6,500 Fire and Life Safety products stocked on our shelves so you don't have to
- Nationwide Will Call and Shipping Centers ensure you get your parts fast!

Exemplary customer service and an unwavering commitment to our business partners ...Heiser Has It!
