

Use Instructions

1.

Remove Cap

Remove the cap from a can of the Smoke Detector Tester. Set the cap aside.

2.

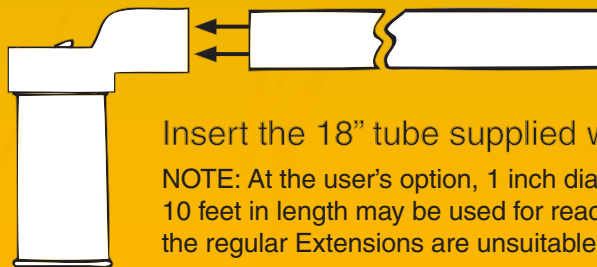

Snap Adapter on to Can

Snap the Model 1490™ Adapter onto the top of the can in place of the removed cap.

3.

Insert Tube into Adapter

Insert the 18" tube supplied with the Adapter.

NOTE: At the user's option, 1 inch diameter tubes up to 10 feet in length may be used for reaching detectors where the regular Extensions are unsuitable or unavailable.

Rotate the nozzle of the Smoke Detector Tester so that the arrow embossed on the top of the nozzle is pointing to the center of the extension tube opening.

Comparison 1490™ Aerosol Adapter to similar Products
